## **Iran War Seen as Reason for Shift to Renewable Energy: ETFs in Focus**

The ongoing Iran war is emerging as a catalyst for an energy shift. Nations are rapidly boosting investments in solar, wind, and battery storage to avoid high energy prices and supply shocks. For example, it's been a "significant turning point" for South Korea's energy strategy, accelerating its move away from oil and toward renewables, according to the country's energy minister, as quoted on ....

....

The president of ....

### **South Korea's Ambitious 100 GW Renewable Target by 2030**

South Korea has set a goal of reaching 100 gigawatts (GW) of renewable energy capacity by 2030. At present, the country has around 37 GW installed, based on data from the Renewable Energy Institute. To bridge this gap, the government plans to prioritize solar and wind energy, with solar expected to play a leading role in the near term.

### **Clean Energy ETFs in Focus**

These clean energy ETFs appear poised to capitalize on the sector's growing momentum. Investors should maintain a long-term investment horizon.

Investors can consider, ... **Invesco Global Clean Energy ETF PBD** and **Invesco WilderHill Clean Energy ETF PBW**. ....
